Zoo Technical Additives:

Multi-strain probiotics & Multi-enzymes.

Technical Additives:

Natural anti-oxidant.

AGE	VOLUME	
	HEALTH 18	WATER
Day1 to Weaning	1 Part	3 Parts

Storage instruction:

Once opened, keep air tight and store in cool, dry and hygienic conditions.

Procedure for using Hand Feeding Formula

Mix 1 part of hand feeding formula (Health-18/ Health-19) in three parts of warm water (40-42°C).

Stir the mixture thoroughly to attain a soft and smooth textured porridge.

Feed the mix to the chick, equivalent to 10% of its body weight at right temperature (37-39 °C) using a sterile crop tube, syringe or spoon.

Strictly adhere to the feed preparation pattern to balance the supplementation of vital nutrients.

The feeding frequencies per day vary depending on the age and species of baby bird.

Note:

Ensure that all feeding utilities used during feed preparation are clean and sterile. Avoid boiling the hand feeding formula to retain the nutritional value. Never reuse the formula; conversely, make a new batch for each feeding. Maintain appropriate feeding temperature to prevent accidental crop burns.
